DETAILED ACTION

Response to Amendment

1. Applicant's After Final amendment filed on October 21, 2005 has been entered. Claims 1 and 10 have been amended. No claim has been cancelled, or added. Claims 1-20 are still pending in this application, with claims 1 and 10 being independent.

Allowable Subject Matter

2. Claims 1-20 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Applicant teaches an image sensor having a light source, a light-reflecting member and light blocking members. The light-blocking members are disposed between the object and both the light source and reflecting member. The light-blocking members are arranged to control the illumination provided to an object of illumination directly from the light source and by reflection from the light-reflecting member, so that both illuminating portions are balanced in quantity, or with a ratio equal to one.

No prior art was found teaching individually, or suggesting in combination, all of the features of the applicants' invention, specifically the light-blocking members controlling the illumination provided to an object of illumination directly from the light source, and by reflection from the light-reflecting member, so that both illuminating

portions are balanced in quantity, or with a ratio equal to one; in combination with the recited structural limitations of the claimed invention.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
